

SWIFTPOINT™

Rated the **BEST NOTEBOOK MOUSE** by Computer Shopper

Small, wireless and goes wherever you go

The Swiftpoint mouse works anywhere your laptop works because you use it on the palmrest next to your laptop's touchpad, or on a desk surface like a traditional mouse.

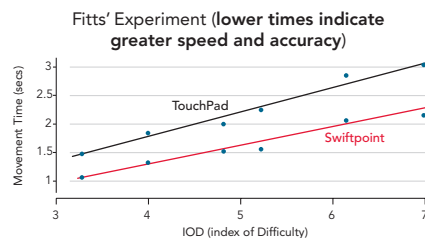

The Swiftpoint mouse comes with a micro USB receiver that provides wireless operation and charges the mouse. It also docks your Swiftpoint mouse magnetically, securing it directly to the laptop so when you move you only carry one thing.

Fully charged, the Swiftpoint mouse's rechargeable battery lasts for as long as 2-4 weeks. But if the battery goes flat, a 30-second rapid charge gives you another hour of use.

40% more accurate than a touchpad

Studies show the Swiftpoint mouse design is up to 40% more accurate than a touchpad.*

It glides smoothly over the surface of your laptop's palmrest so you can work quickly and efficiently in places you once thought impractical. The Swiftpoint mouse is so accurate it can be used for precision applications such as graphic design and gaming.

* Study details.

Comfortable and intuitive pen-like grip

With a pen-like grip the Swiftpoint mouse does away with hand cramps commonly experienced with small mice.

It points and clicks like a traditional mouse and its easy-to-use scroll wheel helps you navigate through documents quickly, or zoom in for a closer look.

When it's time to type, you can park the mouse between your hands. It will stay out of the way until you need it again thanks to the magnetic parking space.

SWIFTPOINT™

Features

Small size, easy to use

The Swiftpoint mouse is ideal for use in small spaces and can be used on your laptop's palm-rest. Left- and right-click buttons and a scroll wheel make the Swiftpoint mouse as easy-to-use as a traditional mouse.

Micro USB dock for charging and wireless operation

No cables required as the USB dock acts as a wireless receiver for up to 30 feet (10 meters) and charges a docked mouse. The dock secures the mouse to your laptop, so when you move, you only carry one thing.

Long life battery

A full charge (90 minutes) gives 2-4 weeks of normal use.

Battery status indicator

The mouse LED lets you know when it needs charging and when it's ready to go again.

RapidCharge™

Charging a flat battery for only 30 seconds lets you use the mouse for up to an hour.

Customizable SmartTouch™

The SmartTouch™ sensor ensures the mouse's pointer stops moving when your finger is not detected on the finger grip. This optimizes power consumption and ensures the mouse pointer only moves when you want it to move.

Parking Accessory

A parking accessory comes with every Swiftpoint mouse. This thin adhesive film has a parking area that secures the mouse in place whilst typing. The parked mouse stays out of the way and is close at hand when you need it. You can cut the thin film to suit the size of your laptop. It is easy to apply and remove and won't leave a sticky residue on your laptop.

SlideScroll™ – scrolling, zooming and paging

Simply tilt the mouse and slide the scroll wheel along the mousing surface to quickly scroll through documents. You can also use SlideScroll to page through a document or zoom in for a closer look.

Plug-and-play simplicity

No software to install, the Swiftpoint mouse gets you started quickly, on any platform.

1000dpi micro optical technology

For precise and accurate operation.

Customizable 'up' direction

Wherever you use the mouse, you can easily change the pointers 'up' direction to suit where you're working.

Product dimensions:

Weight approx 1 ounce
Length 2.2 inches
Width 1.6 inches
Height 1.4 inches

Hardware requirements:

USB port

Supported operating systems:

Windows 7®
Windows Vista®
Windows® XP
Windows® 2000
Mac OS® 10.4 or higher
